## LOH HUANQIAN

---

Loh Huanqian is a principal investigator at the Centre for Quantum Technologies and President's Assistant Professor in the Department of Physics at the National University of Singapore. Since joining CQT as a principal investigator in 2017, Huanqian has established an experimental group to create ultracold molecules which can be used like quantum building blocks to simulate and explore material properties. Recently, she has been named among "15 Rising Talents" worldwide by the UNESCO and L'Oreal Foundation's for Women in Science programme.
