

NATHAN LANGFORD

Nathan Langford is currently a professor in School of Mathematical and Physical Sciences. He is also a core member for Centre for Quantum Software and Information. He received his Ph.D. (runner-up for the Australian Institute of Physics Bragg Gold Medal for Excellence in Physics) in experimental and theoretical photonic quantum information from University of Queensland. His research interests include quantum simulations, quantum computing, quantum tomography, quantum foundations, open and driven quantum systems, quantum chaos and microwave-to-optical frequency conversion.
