ABSTRACT

In this work on the example of educational system of Uzbekistan the new paradigm of education is substantiated in the following edition: **education through all life**. The formalized model presented in this paper in compliance with this paradigm reflects multi-component system, multi-variant approaches and cyclicity of educational process in a modern society. The examples of educational processes which are modelled within the framework of proposed formalized model of education are presented.

Keywords: paradigm, education, formalized model, reproduction of knowledge, innovative-didactic program complexes, pentanom.
